

Blood Relation Questions Overview

Blood Relation Questions have a good weightage in the Banking Exam and the type of question asked in Banking exam is similar to the question mentioned below. It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Blood Relation Questions.

Blood Relation Questions

Direction: Read the given information carefully and answer the following questions. In a family of six members, there are two married couples. Y, who has only one child, is the father of K. T is the cousin sister of K. V is the sister-in-law of P, who is the mother of T. S, who is the paternal uncle of K is married to the mother of T. S and Y are brothers.

Question

How many male members are there in the family?

Difficulty : Moderate

Average Time : 49 Seconds

Options :

1. Two
2. Three
3. Four
4. Cannot be determined
5. Five

Solution

The correct answer is **Option 4** i.e. **Cannot be determined**

Understanding

By making the family tree we get the gender and relationship of all the persons.

Clearly, as the gender of K is unknown, we cannot find the total number of male members in the family.

Hence, the correct answer is **Cannot be determined.**
